### Sedation Dentistry Calms Fears...

Take a ***pill*** and ***snooze*** through your dental appointment.

**F**or many Americans, going to the dentist is a frightful event. If you are one of the 145 million people who avoid the dentist due to fear, we have the solution... Sedation Dentistry.

You can now experience your dental appointment through a totally relaxed and comfortable environment. With the help of Sedation Dentistry, you will wake up to find that your dental appointment is over and the restorations have been completed painlessly.

For those with a busy schedule, we can accomplish more dentistry in one appointment which means fewer visits to the dentist.

Sedation Dentistry is available for everything from simple restoration to the most complex procedures. We are very sensitive to our patients needs, especially those with high fear and apprehension. Now we can put an end to anxiety with this safe and wonderful technique of sedation.

We are proud to be able to offer Sedation Dentistry and offer hope to those who have been avoiding the dentist due to fear. If you would like to know more, call our team with your questions.

## Fat cattle trade improves; encourages us all to eat beef

**Jerry Nine**  
Woodward  
Livestock  
Auction  
Woodward, OK

I assume none of you ate turkey for this past Thanksgiving holiday but instead are eating beef.

Fat cattle trade last week topped at \$135 per hundredweight, which is finally better. However, the same old record of Choice being \$278.41 and Select at \$263.83. They will grade better than 50% Choice but even figuring it at 50% the packer is still making \$538.82 and they also get

ting cheated that it actually is a monopoly.

December live cattle futures are at the highest level since Sept. 2. The cattle harvesting came in at a high level this past week at 677,000 head. Cattle on feed numbers showed 99.9% with placements at 102% and marketings at 95%. Maybe I am wrong but I wouldn't have thought we were placing more cattle in the feedlot and long weaned yearling cattle are very few in numbers. So if they are placing that many it must be with big calves and I wouldn't think that number would be higher than normal. But it is easy to look at your own area and think the whole world is that way.

It seems like we had more drought areas than normal. They say we almost always have at least one drought area.

Feeder cattle prices have been good. On Nov. 18 we sold two groups of 887- to 899-pound heifers that were guaranteed open that brought \$140 to \$143.50. Those heifers were more than likely heifers that didn't breed, which is a pretty good price for those \$1,276. Not bad.

I have everything that I wanted as a teenager, only 62 years later. I don't have to go to school or work. I get an allowance every month. I have my own pad. I don't have a curfew. I have a driver's license and my own car. The people I hang around with are not scared of getting pregnant and I don't have acne. Life is great. I changed my car horn to gunshot sounds. People get out of the way much faster now.

Gone are the days when girls used to cook like their mothers. Now they drink like their fathers. I didn't make it make it to the gym today. That makes five years in a row. I quit calling the bathroom a "John" and renamed it the "Jim." I feel so much better saying that I went to the Jim. I used think nap time was a punishment. Now it is like a vacation.

The biggest lie I told myself, "If I don't write it down I'll remember it." If God wanted me to touch my toes he would have put them on my knees.

And why do I press English when you're going to transfer me to someone I cannot understand. At my age getting lucky is find the bathroom and remembering why. Now I'm wondering did I send this to you? Or did you send it to me"?.

*Editor's note: Jerry Nine, Woodward, Oklahoma, is a lifetime cattleman who grew up on his family's ranch near Slapout, Oklahoma.*

# EXPLORING ENERGY NEWS

## Strategic Optimization 1440

**By: Mark A. Stansberry,**  
**Award-Winning Author**  
**Energy Advocate**  
**and Chairman**  
**of The GTD Group**  
**www.nationalenergytalk.com**  
**FACEBOOK: National**  
**Energy Talk**  
 National Energy Talk Podcast

Strategic Optimization 1440 (1440-how many minutes are in a day) is an initiative that I have designed for companies in the process of corporate development. The energy industry is challenged with the global energy transition dialogue.

This is the first of a series based upon the theme of "Strategic Optimization 1440." I interviewed José Beceiro for the National Energy Talk podcast, which aired on October 2nd. The following is an excerpt from that interview.

(José Beceiro serves as the Senior Director of the Global Energy 2.0 initiative for the Greater Houston Partnership. José is the founder and CEO of Beceiro Strategies. He has worked in the cleantech and high-tech industries for 15 years. His background and areas of expertise include clean energy project development, site selection, university research collaboration, economic development strategy, and corporate business development. As an economic developer, he helped grow Austin's cleantech industry to over 250 companies and 20,000 jobs.)

Mark Stansberry: Where does the oil and gas industry fit in? Where do all forms of energy fit in? You're seeing that in the oil and gas capital of the world and that's happening in Houston. Tell us from 2012 on, this great journey you've had.

José Beceiro: Back in 2012, when I was working for the Austin Chamber for the Austin

Texas region, we were focused on diversifying our regional economic pace and leveraging our tech industry, our IT software industry, computer industries...to try to diversify into new, what we call next wave industry sectors. Cleantech renewables was really the target of the program I was working on in Austin. But, what's interesting, you fast forward to today and my work throughout the decade...I worked for two different universities on energy research programs, I'm working for the greater Houston partnership right now, I've done my own project development work as a consultant to build solar farms in Texas. But, what's really interesting is regions around the nation and especially in Texas, that have focused strengths in certain areas. In Houston its energy, primarily. But, what you start to learn is that every industry is going through a revolution right now. Energy is no exception. When we talk about energy transition or energy 2.0, we're talking about the entire energy industry, we're talking about renewable energy, we're talking about battery energy storage, electric vehicle infrastructure, we're talking about oil and gas as well. But, one interesting thing is we're seeing this trend of not just the energy sector, but health care, life sciences, the space industry, manufacturing, you name it, all going through this digital transformation, dealing with more data in real time, adding more digital technologies to make decisions more quickly, more efficiently, to reduce errors and calculations and predictions judgement. So, that's really what we're seeing in the energy sector today, including oil and gas, is truly an automation digitization and that's what energy 2.0 really means. It's really about bringing new advanced digital technologies to

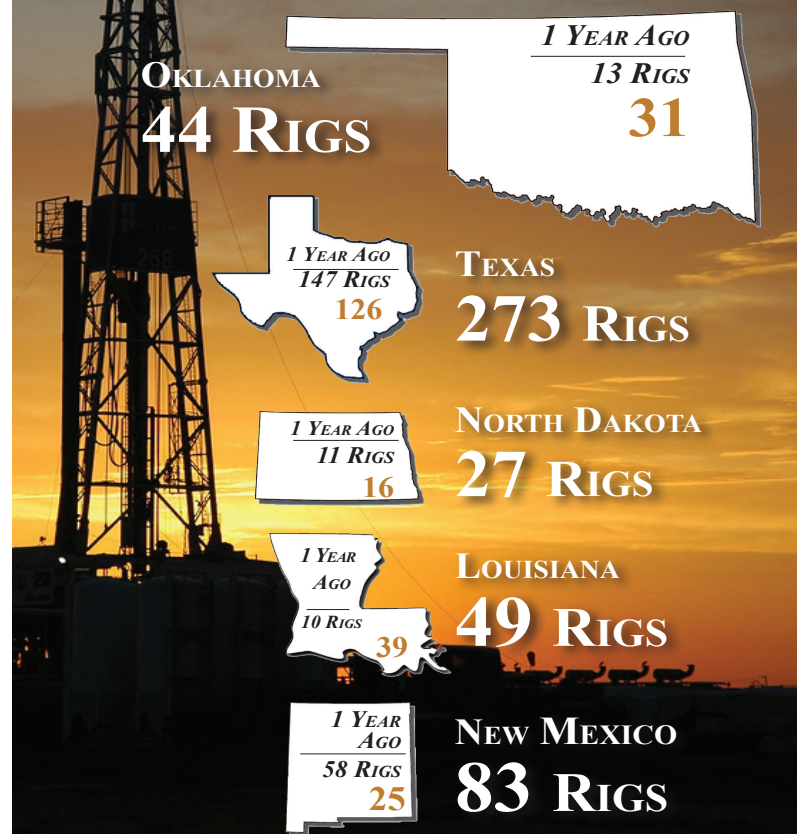

Mark A. Stansberry

Houston, to the doorstep of the global energy industry, especially oil and gas companies. Really trying to create a convergence of technology and energy to help the industry transition accelerate the transition to a low carbon energy. And, that's really the ultimate goal. In Houston today, we want Houston to remain as a global energy capital, which it is. We have eighteen Fortune 500 energy corporate headquarters, we have over 250 thousand direct energy jobs. When you add indirect and induced jobs, it's over a million jobs in Houston that are tied to the energy sector. So, we want Houston to continue to be this global energy capital, but we realize in order to remain this global energy capital, we have to lead the world in energy transition. So, it's really about understanding what's happening and the transformations happening inside the energy sector. That's really what we're focused on.

All applications must be submitted online no later than midnight January 15, 2022. All submitted proofs of purchase become property of Browning and will not be returned. All unauthorized duplicates or invalid submissions will be automatically rejected. Rebate will be issued in the funds of the country in which the eligible product purchase was made. Allow 6-8 weeks for processing and delivery of rebate. Offer void where prohibited, taxed, or restricted by law. Offer valid in the United States and Canada only. All purchasers must be citizens or legal residents of the United States or Canada. Browning reserves the right to request additional information to verify rebates and claims. False information renders the rebate submission void. Violators may be prosecuted. If these terms and conditions are not met, the rebate will not be honored. Browning reserves the right to modify, change, or discontinue this program at any time.

**(DWC) DEEP WATER CULTURE STYLE GROW**  
We pride ourselves on a quality hydroponic grow process which ensure proper nutrients to our plants.

**QUALITY FLOWER, SHAKE & TRIM AVAILABLE**

Why grow DWC? Faster growth - Plants grown in deep water culture intake more oxygen directly from the air than from the oxygen dissolved in water. DWC allows the plants to absorb large quantities of oxygen also allowing the intake of balanced nutrients. This leads to accelerated growth throughout the plant's life, bringing quality medical cannabis to the patients quicker. In DWC, growers have control over nutrients, which means growers can fix nutrient problems quickly. DWC growers are also less likely to have their garden attacked by bugs or pests (though it's definitely still possible). Therefore, it reduces the need for pesticides, allowing us to keep your medicine clean and sticky!! We believe DWC is the best way to grow cannabis.

## Understanding What We Read

STUDENTS OF THE BIBLE

SATAN

The Truth About Satan. Nearly every religion in the world teaches that Satan is a wayward immortal angel kicked out of heaven bringing evil upon man. Would God give immortality to a potential sinner and then place him on earth for puny man to deal with? Let's not make God stupid. Let the word of God clear up this misconception. In the book of Job, God tells us that Job tells us right. We can trust Job's words (Job 42:7). Reading thru the book of Job, Chapters 1 and 2, who or what is this Satan that gave Job all his troubles? Job's wife knew where Job's trouble came from "... curse God, and die (Job 2:9)." Remember God said Job tells us right. This is where Job said his problems came from: "Know now that God hath overthrown me and hath compassed me with his net" "...for the hand of God hath touched me" (Job 19:6,21). Job knew where his troubles came from--God. The word Satan means an adversary or something against you. "Satan stood up against Israel and provoked David to number Israel" (I Chronicles 21:1). Who was the adversary (or Satan) here? Let God's word answer: "And again the anger of the Lord was kindled against Israel, and he (God) moved David against them to say, go number Israel and Judah (II Samuel 24:1). God was the adversary (or Satan). Jesus knew that the word Satan meant adversary: "And he (Jesus) turned and said unto Peter, Get thee behind me, Satan..." (Matthew 16:23). He called Peter an adversary. Did you know God has adversaries? "Because the carnal mind is enmity (adversary), against God..." (Romans 8:7). To be carnal-minded is to do what we want to do instead of following God's advice. This type of thinking is what got man in trouble in the Garden of Eden. Are we going to believe the word of God and his servants or what someone else says? Study to see if these things are true.
