All natural' description is latest in trends for cattle

**Jerry Nine
Woodward, OK**

One term we have started using in the past few years is "all natural." That's one way of saying, "I didn't want to go to the trouble of getting them in and vaccinating them."

I know I just made the blood pressure go up on some cattlemen selling their cattle with

no hormones, but I don't think that is without any shots. Instead of saying my boys were ornery, I should have said my boys are just very active.

Another thing that has changed in the past 30 to 40 years is that most big bunches of yearling heifers are now "guaranteed open." When I first started buying feeders for feedlots, they did not pregnancy check their heifers. I remember one call I got from a feedlot manager who said, "Look and see whose heifers you bought that brands with a T." I looked and told him who I bought them from. The feedlot manager said, "Don't you ever buy his cattle again, even if he has the best steers you have ever seen."

He said they were having several calves a day. He said you can't get that good of conception even when you are trying.

My third son sold his calves at the sale last week. I had bought them for him and just bought as many as we could for \$50,000, so, yes, I had some plain ones on there as we bought 58 head. Naturally, when the plainest ones came into the ring, some of the buyers said out loud, of course, when I would hear, "I think that kid needs another order buyer."

So I said, "I would be glad to let you buy them and take them to your house and run on your wheat and grass. Then the poor kid can finally run some good cattle."

By the way, five of his steers brought \$1,917 per head, and eight heifers brought \$1,746. Not too bad for him. Not sure about for me?

At the sale the other day, one buyer, who is about 70 years old, said to another buyer, "Age takes care a lot of things that church gets the credit for."

Editor's note: The views expressed here are the author's own and do not represent the view of High Plains Journal. Jerry Nine, Woodward, Oklahoma, is a lifetime cattleman who grew up on his family's ranch near Slapout, Oklahoma.

We specialize in AGRICULTURAL and INDUSTRIAL DETAILING and CERAMIC COATINGS

We rejuvenate faded paint and keep it protected with our industrial grade Ceramic Coating!

Our **CERAMIC COATING** helps equipment stay clean longer and protects against chemicals.

We also offer our **ANTI-CORROSION CLEAR COAT**. It can be sprayed clear or tinted any color! It also helps prevent rust and is self-cleaning.

We are Fully Insured and Certified in all of our products and services.

WE WILL COME TO YOU!
No Need to Haul it!

KECO 96.5

for your SEVERE WEATHER COVERAGE

Paragon Communications wants to help keep you safe during Storm Season!

When severe weather rolls into the listening area, you'll hear a soft two-tone combination sounder on KECO & KOOL 94. This means severe weather is threatening, and that we're keeping an eye on it to let you know what's going on.

So when the weather turns ugly, tune in to KECO 96.5 or KOOL 94.3 for the latest updates!

Map of Texas showing the listening area.

KOOL 94.3

TO: KECO FM
May 25, 2015

To General Manager & Staff:

My Compliments and Thanks to KECO!

Two weeks ago, while traveling back east on my cross-country trip from California to Maine, I was traveling east along I-40 from Amarillo, Texas into Oklahoma. I knew that severe weather was expected and was closely scanning my car radio to both AM and FM bands for weather updates, as skies started turning dark and threatening once I got east of Amarillo.

Things were OK until I hit the Oklahoma border and rain was falling heavily, and I entered a substantial thunderstorm. Being a weather geek and weather spotter for our local NWS office here in Maine, I was constantly scanning the skies for any signs of tonadoes and rotation in the clouds. I was happy to pick up 96.5 and turned into a rest area to ride out the thunderstorm, and listen to your latest forecasts. As soon as I go into the rest area, KECO broadcast the EAS tones and you aired the announcement from NWS in Norman. They gave locations of several possible tornadoes, which by referring to my road map, I was able to locate and avoid. As soon as the EAS broadcast concluded, your local announcer came on with additional information about nearby storms.

I want to compliment the announcer who was on the board between 3 and 5pm on Friday, May 8th. He was very professional sounding and informative. And he kept updating every 15 minutes which was most appreciated. As a former radio broadcaster & program director at an Alaska station, I still enjoy listening to local stations which broadcast to the community.

One thing I did notice which caught me by surprise, was after your EAS alert, and you went back to music, there was a "tone" signal, sounding like a door bell every minute or so...At first I thought it was my cell phone, but the announcer explained that it sounds every 2 minutes while there is an EAS alert in progress. This is the first I have heard of that feature!

I had to let you know how much I appreciated hearing a real local station broadcasting "in the public interest"! My compliments and thanks to all involved!

Sincerely,
Rod O'Conner
from Maine

This is why we do it!

Fatal Semi Collision Claims Life in Roger Mills County

October 6, 2024 - A tragic fatality collision occurred on October 5, 2024, around 12:30 p.m. at the intersection of OK-47 and N 1710 Road, approximately one mile west of Reydon in Roger Mills County.

The accident involved a 2016 Freightliner semi driven by 56-year-old Michael R. Hatfield of Elk City. Hatfield was traveling westbound on OK-47 when, for reasons currently under investigation, his vehicle left the roadway. In an attempt to correct course, Hatfield overcorrected, causing the semi to roll roughly one and a half times before coming to rest on its top.

Emergency responders from the Reydon Fire Department worked to free Hatfield, who was pinned inside the vehicle. Despite their efforts, Hatfield was pronounced deceased at the scene due to head and trunk internal injuries.

The cause of the collision remains under investigation, and authorities are working to determine what led to the vehicle leaving the roadway. Hatfield was reportedly wearing a seatbelt at the time of the crash.

Sedation Dentistry Calms Fears...

Take a *pill* and *snooze* through your dental appointment.

For many Americans, going to the dentist is a frightful event. If you are one of the 145 million people who avoid the dentist due to fear, we have the solution... Sedation Dentistry.

You can now experience your dental appointment through a totally relaxed and comfortable environment. With the help of Sedation Dentistry, you will wake up to find that your dental appointment is over and the restorations have been completed painlessly.

For those with a busy schedule, we can accomplish more dentistry in one appointment which means fewer visits to the dentist.

Sedation Dentistry is available for everything from simple restoration to the most complex procedures. We are very sensitive to our patients needs, especially those with high fear and apprehension. Now we can put an end to anxiety with this safe and wonderful technique of sedation.

We are proud to be able to offer Sedation Dentistry and offer hope to those who have been avoiding the dentist due to fear. If you would like to know more, call our team with your questions.
